SuperFlex

A HIGHLY FLEXIBLE LINER WHICH CAN BE FOLDED OR BENT TO FIT CURVED SURFACES!

KPM SuperFlex

Alumina-content ceramic tile embedded in resilient rubber matrix. The ceramic tile is rectangular or square in shape. It is a highly flexible liner and can be folded or bent to fit curved surfaces. It is backed by protection sheet and affixed by means of adhesive or vulcanization process.

Can be custom made to various shapes and sizes. Standard sizes are:

- L x W - 500mm x 500mm
- Thickness 15mm, 20mm, 25mm

Liner Benefits:

- Alumina ceramic content provides ultimate wear protection
- Rubber absorbs impact and helps add a cushion to the ceramic bed resulting in less cracking occurring
- Can be easily glued in place
